I would like to basically say that I pay for my services from the above listed provider and the service is excellent. I would like for you the FCC to reject the above mentioned petition on the basis that I myself and many others benefit greatly from the services provided by xm satellite radio. This service is greatly appreciated from all that use it, for example; truck drivers, people in route to work, or even you who go to work and think up petitions such as these. I would like to remind you that these services are paid for by myself and others that use them. If you don't like it, dont subscribe. sincerely, Adrien Jones.
